2	Asa Bales
3	Freedom Park
4	Hadley Park
5	Liberty Park
6	Natalie Wheeler Trail
7	Osborne Park
8	Quaker Park
9	Raymond Worth Park
10	Simon Moon Park

A photograph of a park area. In the foreground, there is a wooden bench with black metal armrests and legs, situated on a brick-paved path. To the left of the bench is a large, leafy green tree. In front of the bench is a landscaped area with low-lying green shrubs, yellow flowers, and a bed of light-colored mulch. A brick wall is visible in the background, and a small blue mailbox is mounted on a black post to the right of the bench. The overall scene is lush and green, suggesting a well-maintained park.

PARKS & RECREATION
DEPARTMENT

2007 Guide

Hadley Park

Hadley Park is located in the heart of downtown Westfield. It is a .25 acre site that is a passive area with seating and a covered area for passers by. This park is maintained by the Hamilton County master gardeners and the Westfield Public Works Department.

Asa Bales Park (Skateboard Park)

Asa Bales Park is a ten acre park located in the heart of Westfield. The J.M. Thompson Regulated Drain runs through the park from north to south and offers the opportunity to view various species of wildlife. The drain banks are planted with prairie grasses and wildflowers to increase the naturalness of the setting and to ultimately increase the water quality.

The park has a paved pathway that runs from State Road 32 to Hoover Street. The park also includes a full skateboard park with benches, three picnic shelters, a playground and restrooms.

The north end of the park was renovated in 2006 with the addition of two shelters, restrooms and the skateboard park. In the future, the south end will see the addition of an amphitheater, another shelter, more restrooms and a formal garden entrance to Union Street.

Martha Doan Memorial Gardens

The Martha Doan Memorial Gardens is located on Union Street, just South of State Route 32. It is a small piece of land made up of beautiful flowers and greenery. It is named after Martha Doan, a longtime resident of Westfield and a dedicated member of the Westfield Women's Club.

Natalie Wheeler Trail

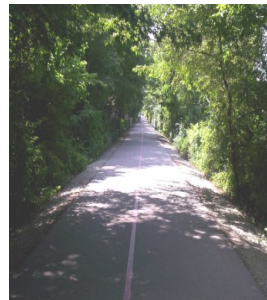

The Natalie Wheeler Trail is located on the south end of Westfield. This one mile plus trail connects Cool Creek Park with Woodside Drive on Westfield's south side. This trail will ultimately become a link with the Monon and the Midland Trace Trails when they are constructed.

Monon & Midland Trace Trails

The Monon and Midland Trace Trails are part of the major arteries of a statewide trail system. The Monon Trail extension into Washington Township has received an initial grant to provide the first mile of construction. This will take place in 2007. Master Planning has been completed for the both the trail systems through Washington Township.

The Midland Trail runs east and west through Westfield and is also a construction priority. The Midland Trail will travel directly through downtown Westfield and is adjacent to Martha Doan Memorial Gardens, and then travel eastward along the northern border of the Simon Moon Park. It will continue eastward along the southern edge of Westfield Market Place to our eastern most border at Gray Road.

Quaker Park (Splash Park)

Quaker Park is a seven acre park located on State Road 32 on the west side of Westfield, directly behind the Public Safety Building. The park is situated on the Midland Trace Trail and is the only developed part of the trail on the west side of US 31. The trail connects to Oak Ridge Road and its perimeter pathways. The park has four picnic shelters, which are grouped together for the purpose of large gatherings.

Quaker Park is home to Westfield's first splash park. The splash park is a fun way to spend a warm afternoon. There is also a playground, restrooms, basketball court and playing fields. Quaker Park was also renovated in 2006.

Freedom Trail Park

Freedom Trail Park is located on the near east side of Westfield, adjacent to Washington Woods Elementary School and the Willow Creek and Silver Lake Subdivisions. This 20 acre parcel is dedicated mainly to youth sports, specifically football and lacrosse.

The park is bordered by Cool Creek and has a beautiful riparian way on the east side of the park. There are some minor wetlands and the flora and fauna in this area make for a unique setting.

Raymond Worth Park

Raymond Worth Park is located on the far west side of Westfield. The 17 acre tract has been left natural. There is a small gravel parking area and there are several tree plantings on the site.

The future plans for this site are undecided.

Simon Moon Park

Simon Moon Park is a five acre parcel located on the east side of Westfield, next to the Westfield Public Works Campus. The property is located adjacent to the Midland Trace Trail and has a pathway that will connect to the trail when it is developed.

The park has a small parking area, next to a picnic shelter and two playgrounds. In the future, the park will expand on to adjacent property and include two settling basins that are located at the rear of the property.

Trails will be incorporated onto the park and interpretive signs located around the basins explaining how the basins were used. A portion of the Midland Trace Trail will also be constructed. In addition, another splash park will be constructed at this location.

Osborne Park

Osborne Park is a 35 acre site located in the Maple Knoll Subdivision. This site is in the planning stages and will be primarily used for youth sports.

Armstrong Park

The Armstrong Park is a 15 acre site located in the Countryside Subdivision. This park is also in the planning stages and will also be primarily used for youth sports.

Liberty Park with the Richardson Wetlands

Liberty Park is a five acre site that includes the Richardson Wetlands. This wetland mitigation site was developed on Cool Creek to help with water quality and management.

This site includes aggregate paths and a boardwalk leading to an observation deck overlooking the wooded wetlands. This site is an important ecological site and will be completed in 2007.
